**Disclosure:** This illustration shows the minimum adjusted income for a single individual investing at age 60 assuming no withdrawals for 5 years. It does not apply state variations. It does not account for any potential step-ups that could generate a higher income or increases from a potential variable or stacking component. Assumes market return covers rider cost. This information is current to the best of our knowledge as of October 2023, withdrawal percentages and roll-up rates are subject to change. Although most products are represented, other versions or surrender periods from a carrier could produce a different rate.

**Income Rate:** Individual investing at 60, benefit base increasing by guaranteed roll up rate or deferral rate, then withdrawing money at 65 for life at income rates. Some Rates have the potential to increase after withdrawals start if there are earnings from interest or an inflation adjustment.
